Product Update API

- 1. Use cases**
- 2. Important notes**
- 3. Architecture**

Uses cases

Update price

Price Information can be updated via the API

Visibility of products

Hide out of stock products
- show in stock products.
Update Visibility of the products.

Further fields

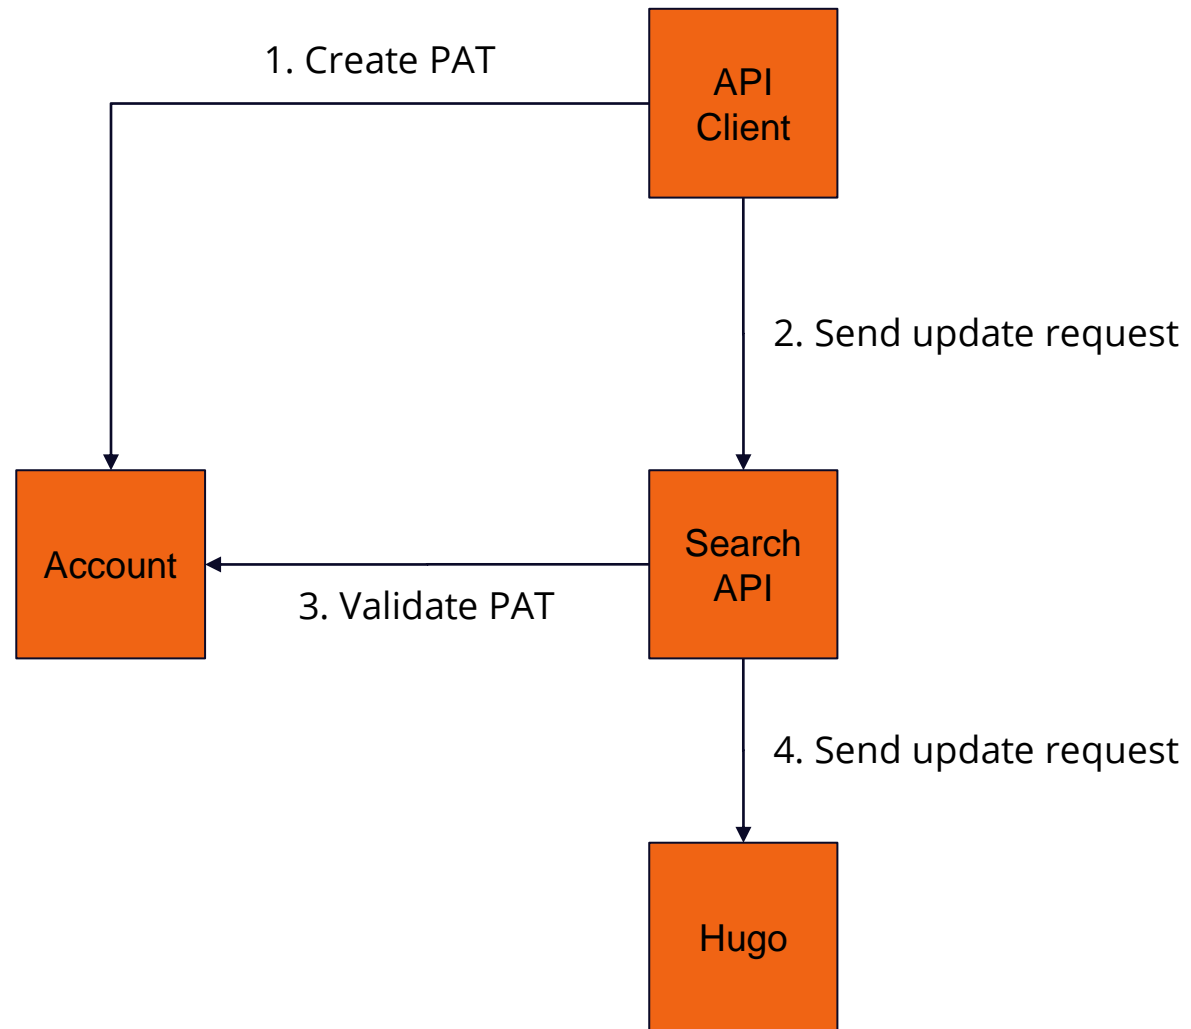

The API has been built open for future extensions. Further fields can be implemented that do not affect full text search or merchandising features.

Works with existing Usergroups and Variants

Important notes

- Product placements must always be fully updated - also in case of price only updates
- New Usergroups cannot be created within those updates
- Periodical full imports are still required for:
 - Consistency
 - Housekeeping
 - Adding products
 - Modifying other fields

Architecture

THANK YŌU
